DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23 and 37-51, drawn to a camera where the film chamber has an endcap assembly with a movable shutter blade, classified in class 396, subclass 538.
- II. Claims 24-32, drawn to a method for loading film into a camera with a detachable drive source, classified in class 396, subclass 388.
- III. Claims 33-36, drawn to a method of loading a DCS film cassette into a camera, classified in class 396, subclass 512.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the camera can be loaded with film using a method other than what is claimed, such as by rolling the film around a spool and then placing it in the camera inside a darkroom. The subcombination of Group II has separate utility such as a method of loading film into a camera and then winding it using a detachable drive. This method could be used with a camera other

Art Unit: 2851

than the camera of Group I. Further, the subject matter of Group III is directed to a method of loading a DCS film cassette into a camera. This cassette would not necessarily be used with the camera of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
